

KY Services Satisfaction Consumer Survey Report 2018 Pennyroyal

In 2018 the Kentucky Cabinet for Health and Family Services (CHFS), Department for Behavioral Health, Development and Intellectual Disabilities (BHDID) conducted this survey to evaluate satisfaction of services delivered at Kentucky's Community Mental Health Centers (CMHCs).

Introduction

This document was created as a result of collaboration between two key entities:

- The Kentucky Department for Behavioral Health, Developmental and Intellectual Disabilities (DBHDID) and
- The Community Mental Health Centers (CMHCs)

Purpose

The purpose of this document is to evaluate the satisfaction of services delivered by the Community Mental Health Centers (CMHCs) from the consumer's perspective. The source of information reported in this document is aggregated results of a survey.

Why This Survey?

The Mental Health Statistics Improvement Program (MHSIP) survey was developed and validated at a national level in part to promulgate data standards that allow for valid results that better inform policy and decisions. The MHSIP adult survey is designed as the primary tool to evaluate and include the clients' perspectives of public mental health services they have received.

Appropriate Use of These Survey Results

The results of this survey are intended to express the aggregated data of respondents' perception of care. This booklet represents the perceptions of a sample of CMHC clients who are actively receiving outpatient services during the time of the survey implementation. The results are not intended to be interpreted as the opinion of all CMHC clients of services received.

This output report includes results about the survey's seven core domains:

Domain	Primary Concerns Related to the Domain
General Satisfaction	Services were, overall, satisfactory and preferable to other choices
Access to Services	Staff availability, the range of service options, and how quickly and conveniently services were received
Cultural Sensitivity	Cultural and linguistic access and whether services promoted recovery and continuity of care
Participation in Treatment Planning	Clients' participation in planning services. For example, whether the patient, not staff, decided treatment goals
Outcomes	Services provided patients with positive changes in areas for which treatment was sought and minimal negative outcomes.
Social Connectedness	Services contributed to improving natural supports which come from family or friends
Functioning	There was a positive effect on independent community living and decreasing distress caused by symptoms

State Mental Health Authority

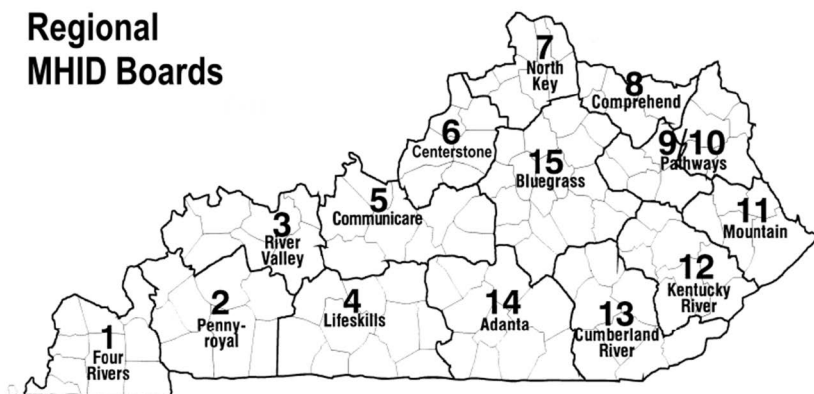

The Kentucky Department for Behavioral Health, Developmental and Intellectual Disabilities (DBHDID) is identified by Kentucky Revised Statute (KRS) 194.030 as the primary state agency for developing and administering programs for the prevention, detection, and treatment of mental health, developmental, intellectual disabilities, and substance use disorders.

DBHDID Website: <http://dbhdid.ky.gov/>

Regional Community Programs

Kentucky is divided into fourteen geographic regions for the purposes of planning and providing publicly funded community mental health services. For each region a Regional Board for Mental Health or Individuals with an Intellectual Disability has been established pursuant to KRS 210.370-210.480 as the planning authority for community mental health programs in the region.

Regional MHID Boards

CMHC Profile

Pennyroyal Center is a comprehensive Community Mental Health Center providing services for Mental Health, Intellectual and Developmental Disabilities and Substance Abuse. Pennyroyal Center has four full service clinics located in Hopkinsville, Madisonville, Greenville and Princeton.

The mission of the Pennyroyal Center is to improve the quality of life for the citizens of this region by planning for and providing services for persons with mental illness, intellectual or developmental disabilities and substance abuse.

The Pennyroyal Center was founded in 1967, but the roots go much deeper. In the 1940's Hopkinsville business man Frank Yost and his wife Ruth took a keen interest in improving care for patients at Western State Hospital. Mrs. Yost helped create many new programs at the hospital including a beauty and barber shop and other services. But they also realized that there was a huge gap in mental health services within their community. In the mid 1950's the Yosts helped create a community mental health clinic which was featured on a live CBS telecast by Edward R. Murrow.

In the 1960's Kentucky became a leading state in creating a statewide network of community mental health centers. The Pennyroyal Center was a result of those efforts and continues in its mission today of providing and planning for services to help the residents of its region in the areas of mental health, substance abuse and intellectual and developmental disabilities.

Counties

Caldwell, Christian, Crittenden, Hopkins, Lyon, Muhlenberg, Todd, Trigg

Services

Mental Health Care: Individual Therapy, Group Therapy, Family Counseling, Children's Services, Marital Counseling, Case Management, Therapeutic Rehabilitation Program, Interagency Mobilization for Progress in Adolescent and Children's Treatment (IMPACT), DIVERTS, Therapeutic Foster Care, School Services, Divorcing Parents Workshop, Prevention Services, Domestic Violence, Anger Management, Employee Assistance Program (EAP) Services.

Methodology

The survey was implemented at outpatient clinics operated by the CMHCs. During each summer staff made the survey available to people who arrived for outpatient appointments at selected clinics. Completing the survey was voluntary and had no implications on appointments or services provided.

Survey Penetration Rate

Survey Penetration

Table 1. Pennyroyal Survey Penetration Rate in State Fiscal Year 2018 (July 1, 2017 - June 30, 2018)	
Number of Adults (Age 18 & Above) Served	9,583
Number of Surveys Returned	479
Survey Penetration Rate	5%

During state fiscal year 2018, 9,583 Mental Health (MH) adult clients visited Pennyroyal. Four hundred seventy-nine adult clients participated in the survey in Pennyroyal, resulting in a 5% penetration rate. (Table 1)

Adult Clients' Demographic Characteristics

The demographic profile of MH adult clients in Pennyroyal in 2018 is presented below. In this report, adult respondents' demographic characteristics are presented on gender and race.

Gender

Table 2. Gender of Adult Respondents	
Male	41%
Female	59%
Total	451

As Table 2 indicates, female respondents outnumber male respondents.

Race

Table 3. Race of Adult Respondents	
American Indian / Alaska Native	1%
Asian	0%
Black (African-American)	13%
Hispanic	3%
Native Hawaiian / Other Pacific Islander	0%
White (Caucasian)	78%
Other	6%
Total	479

The majority of adult respondents are White (Caucasian) (78%) while 3% of respondents report being of Hispanic descent.
